SUES BILBY ON CONTRACT

Maud Bird Files Suit for $3,380, Claiming That Sum Is Due Her on Agreement.

Maud Bird filed a suit today against R. I. Bilby, trading as the Nodaway Valley Company, for $3,380 on a contract. Mrs. Bird's husband, John Bird, was killed a number of years ago and the petition states it was due to negligence. An agreement and contract was entered into by Mrs. Bird and Bilby in which Mrs. Bird was to receive $20 a month during the infancy of her youngest child. The petition claims $820 was paid, and the balance or $3,380 is unpaid and due. The child at that time was about six months old.

RUFUS SMITH ARRESTED

Arkoe Man Charged With Resisting Arrest by Mort Smith—Spectators Said to Have Taken Part.

Arkoe was the scene of quite a fight last evening when the town marshal, Mort Smith, attempted to arrest Rufus Smith, who was said to have been drunk. Rufus Smith resisted and tore the shirt off of the marshal. Quite a crowd collected to witness the affray and the billy of the marshal was taken away from him by one of the spectators.

Word was sent to Sheriff Dowden who went to Arkoe and arrested Rufus Smith on a charge of common assault and resisting an officer. He waived preliminary and was bound over until the September term of court.

CHICAGO MEN READY MONDAY.

Special to The Democrat-Forum.

Chicago, Aug. 9.—Major Chipperfield, who is superintending the operation of **the exemption boards here, said today** that he would wire General Crowder that ten thousand drafted Chicagoans will be ready for the new national army next Monday.

ONE-THIRD BY SEPT. 1

THAT MANY FROM THIS COUNTY'S QUOTA WILL BE CALLED.

TO PASS ON CLAIMS SOON

Board Will Meet Tomorrow to Check up and More Men Will be Called —Yesterday's Results.

One-third of Nodaway's quota of 202 men for the selective draft will be called to the colors September 1 to go immediately to training cantonments, according to the ruling of Provost Marshal General Crowder.

The following telegram was sent yesterday from Washington to governors of states cautioning them to make certain the first one-third of their quota of the first increment of registered men is ready in this time:

"New regulations governing mobilization and certification of men from district boards to adjutants general will be mailed to you Aug. 9. Local boards should certify to district boards daily those who have been called and who have not been exempted or discharged because they failed to file a claim or because their claim has been decided adversely.

Strict Compliance Necessary.

"Strict compliance with this rule is necessary since on Sept. 1, the war department will call for not to exceed one-third of the quota from each state to be entrained for mobilization camps between Sept. 1 and Sept. 5. Unless we wish to be put in a position of not furnishing men as fast as the war department is ready to receive them, each state should have accumulated by Sept. 1, a minimum of one-third of its quota not exempted or discharged. This can only be attained if local boards crtify these lists up with great expedition."

The message was followed by a new ruling on exemptions because of dependents, which is expected to decrease considerably the loss of men from military service.

Boards are authorized to deny exemptions to married men in cases where parents or other relatives of wife or husband are willing to assume the burden of the wife's support during the husband's absence. The same action applies where drafted men's employers agree to continue his salary.

A third supplemental ruling provides that exemption may be denied in the case of a man who has supported his dependents by his own labor on land he owns, but which could be rented so as to continue support for his wife.

Yesterday's Examination.

The total number of men examined yesterday was 128, seventy-two of them being rejected on account of physical defects. Fifty-six were accepted, thirty-five of them claiming exemptions, twenty filing no claims, and one filing an appeal to the district board.

Consideration of claims for exemption will be begun by the local board tomorrow. Then will be known the number that will yet have to be examined in order to obtain the quota. A considerable number of the men needed will be obtained, it is felt, from those whose exemption claims are refused.

More men will be summoned to appear for physical examination next week. It is probable that 400 men will be ordered to appear.

The men examined yesterday and the results of the examination were:

Marion Lyman Rickard, Pickering; rejected, throat trouble, collar bone broken.

Thomas O. Hughes, Guilford, rejected, deformed shoulder and spine.

Alloysius Bernard Henggler, Maryville; rejected, left leg.

Ora E. Keever, Skidmore; rejected, flat feet.

Loren Ray Vogt, Conception Junction; accepted; filed dependent exemption, wife and one child.

Clyde Middleton, Hopkins; accepted; filed dependent exemption, wife and two children.

Roscoe Roswell Heifner, Maryville; rejected, flat feet.

C. E. Kane of Maryville Who Is in France Writes of Experiences to University Paper.

According to the Daily Missourian of Columbia, the new address of Missouri ambulance men, of which Charles E. Kane of this city is a member, is now "T. M. 133 Convois Automobiles, B. C. M., Paris, France." The new address is the headquarters of the transport service, in which the men are now engaged.

The Missourian says:

Members of the University of Missouri unit of the American Ambulance Field Service are enjoying life "Somewhere in France" with unexcelled food, time for recreation and unbounded enthusiasm in their work, according to word just received from Charles E. Kane, formerly instructor in the School of Journalism. The letter, written July 14, the French Fourth of July, celebrating the fall of the Bastille, follows:

"Somewhere in France, Saturday, July 14.—This is the French Fourth of July—ten days after our arrival in France, a week after our arrival in this training camp for truck (cannon) drivers—and we have a regular banquet at the expense of the French government, which is feeding us, training us to be drivers of five-ton Pierce-Arrow trucks, and paying us the astonishing wages of five sous (about five cents) a day. Twenty-two members of the Missouri unit of the American Field Service are here. Of the four others, Gardner, Gardere and Frick are in training for the ambulance branch of the service, and Bruner is still in Paris.

"The men here now—roughly classified as the 'Rochambeau bunch', because they came ove ron that liner—feel like veterans at present. Eleven new men from the La Touraine came in yesterday (a larger group went on to a new camp), and the old timers here are taking part of this holiday off to show them the ropes. Others have driven off on trucks to the nearest big town on the front; a good many are writing letters; some are in at the village a mile away and the rest are trying to digest the banquet of ham, sausage, beef, beans, lettuce, bread, butter, jam, coffee and champagne, not to speak of the cigars—and all of this in France! The anniversary of the fall of the Bastille is a great holiday here, and no scarcity of food is apparent. We are well fed all the time, too, but not so well as today, of course.

"Ordinarily we do not have a holiday. We get up at 6 and go to bed at 9:30, all by French time, which is on the daylight-saving plan. During the

French Troops Gain Ground in Flanders—Germans Try to Force Back Russo-Roumanians.

Special to The Democrat-Forum.

Paris, Aug. 9.—Far from having her man power on the Eastern front exhausted, Germany is using eighty-eight divisions, or approximately a million one hundred forty-five thousand seasoned first line troops against the Russians and Roumanians. These figures were secured today from members of the Russian mission now in Paris. They confirm the belief recently expressed that Germany purposely falsified their statements as to the population of the country before the outbreak of the war.

Allied Troops Press Forward.

London, Aug. 9.—While British artillery pounded at the defenses of the great German base at Lens in Northern France, Allied troops pressed forward in Flanders during the night, gaining ground near Biechoote, the war office announced today. Northwest of Bieschoote the Germans were compelled to fall back before the French thrust, which was made in a rain storm over a field of deep mud.

Fierce Fighting in Moldavia.

Geneva, Aug. 9.—Von Mackensen's forces in the Roumanian province of Moldavia are fighting desperately to drive the Rus-Rumanian armies back to the banks of the Stereth river, says a Vienna dispatch.

LATE TELEGRAPH NEWS.

Special to The Democrat-Forum.

Kansas City, Aug. 9.—Not a street car has moved since four o'clock yesterday afternoon when the company gave up trying to give even partial service. Indications are that the strikers have the system completely tied up unless strike breakers are brought in.

McAlester, Okla., Aug. 9.—An attempt was made at Scipio last night to burn the home of Travis Meyers. The house was being watched, but the man escaped. Three anti-drafters arrested at Indianola had a quantity of dynamite with them. An uprising is reported at Blanco and officers have gone there.

St. Louis, Aug. 9.—Mystery woman in the suicide of Millionaire Lambert found today. She was Lambert's former stenographer, Miss Alvina Perstrup, and is 25 years old. "Just good friends," she said, "and there was no affair between us."

Washington, Aug. 9.—Regular army at full strength was announced today.

day we have sometimes as much as three hours to ourselves; the rest of the time usually goes like this: 6:05, setting-up exercises; 6:30, breakfast (petit dejeuner); 7, assembly, roll-call; then drill; 9 to 11, truck driving; 11:30, lunch (dejeuner); 1:30, roll-call; 2 to 5, (usually later) truck driving; 6, dinner (diner); 9, roll-call; 9:30, taps, lights out.

"We are learning pretty well the trick of driving in convoy and can almost separate the French manual of arms from the American manual, which most of us have had training in; so we hope to get out into real service some time this week, with the two sections of sixty drivers each that are in training here. Our twenty-two men are in one squad under the direction of a corporal named Miller; one of the two other squads is made up of Boston Tech men, and the third is of men who came unattached.

"The boys asked me to explain why we went into the camion service instead of the ambulance work. When we arrived in Paris we found that the French needed transport drivers more than they did ambulance men, and as we came all the way across the ocean with the idea of being of the greatest possible service, the men voted for the transport work. There will be plenty of chance to see the front; our sections—all the new American transport men—are going into Mallet's Reserve, which is shifted to the place where things are happening. We may work all the way from Belgium to Switzerland. Anybody who cares to write to us can reach us best through addressing us at 21 Rue Raynouard, Paris, France. Incidentally, it takes a nickel's worth of stamps.

"Our quarters here are in a neat, whitewashed stable in a picturesque country and on a French farm. Our place is considerably drier than the tents in which most of the men are quartered, and we are very well satisfied. The French soldier-mechanics who are quartered in the loft above, have made us some shelves, some benches and a table. Just as a precaution, most of the men have had their hair cut short or their heads shaved. Cowan is our barber, and he is the best in camp, judging from the other heads we see. 'Jumbo' Farmer had his hair cut short and an M shaved on his head. Several of the bunch have left off shaving their upper lips. The home folks will greet a queer looking lot of fellows in—well, a year or two or three."

A SUCCESSFUL CHAUTAUQUA

Graham Assembly Was a Financial Success—Plans for One Next Year.

The Graham Chautauqua closed Tuesday night with an entertainment by the Swiss Family Plouer, which was very pleasing and well received. They were followed by J .Alden Loring ,in an illustrated lecture of the Roosevelt Expedition in Africa. Mr. Loring was a member of the expedition and gave an entertaining talk.

The Chautauqua lasted six days, two programs each day, all of which with the exception of one or two programs, were splendid, giving entire satisfaction to the good people of Hughes township.

The Chautauqua at Graham was a decided success and this was due largely to the efforts of the executive committee, consisting of Dr. E. L. Morgan, president; C. R. Leeper, vice president; J. N. Geyer, secretary; W. E. Freytag, treasurer; F. L. Miller, C. H. Talbott, Frank Lyle, Clyde Long, Frank McNeal, William Morris and Dan Mowry, who worked faithfully and earnestly for the success of the enterprise and this was made possible by the generous support given them by the citizens of the community and whose patronage was certainly appreciated by the committee.

Plans are already under way for a Chautauqua next year, as all bills will be met and there will be a surplus in the treasury.

The people of Hughes township are entitled to praise for their support of such enterprises as this.

FIRE IN COAL AT NORMAL

About $400 Damage Resulted at the State Normal School Bins This Morning.

For the second time this summer fire broke out this morning in the coal stored in the bins at the Normal school, in the opposite end of the bins.

The fire had been smouldering for several days but attracted no attention until early this morning when it suddenly blazed up and fired the building in which it was stored. The fire department was called at once but it was some time before enough hose could be found to reach from the standpipe which was the nearest point at which the hose could be attached. Fire Chief Rowley stated that it was the longest line of hose he had ever laid.

Most of the damage done was to the roof of the bins and will probably amount to $300 or $400. The coal is being removed and will all be saved.

At the Empire Tonight.

The spectacle of a speeding auto plunging over the cliff into the sea, carrying its occupants to destruction, furnishes a big thrill in "Redeeming Love" which comes to the Empire Theatre tonight. It was a Morosco-Paramount Picture starring Kathlyn Williams supported by Thomas Holding.

That this narrative is true and that truth thus may be stranger than fiction is attested by the Altamont Times. The women folks of the Marion Wilson household were chasing a rat which they had found in the cave. Interested in the progress of the battle, a little girl started down the cave steps just as the rat, hard-pressed by his adversaries, came up. He tried to run up the little girl's sleeve, squeezed his head past the wristband and there choked to death.

It's an ill wind that blows good to no one, and even the escape of live baggage from a Burlington train brought a little advertising to the Tarkio Avalanche as this item proves: "Lost—A reward will be given for the return of a brindle Angora cat which escaped from the baggage car on the morning train Tuesday, near the brick yard"

While hunting for a bootlegger's stock in trade at Ellston, Iowa officers found the harness stolen from a Worth county man last week, but thus far have not been able to apprehend the thief and thus claim the $150 reward.

A Perfect Baby

To possess a literally perfect child is by no means impossible. The expectant mother should be calm and the days should be filled with sunshine and happiness.

Millions of women have used the safe, external, penetrating preparation known as "Mother's Friend". By its use the abdominal muscles, which nature is expanding, relax easily when baby is born. This naturally makes for infinitely less pain and danger at the crisis.

Write to The Bradfield Regulator Co., Dept. H, 300 Lamar Building, Atlanta, Ga., for interesting free book "Motherhood and the Baby".

Do not neglect to get a bottle of "Mother's Friend" from your druggists' tonight. It is a tried preparation and is of the greatest value to expectant mothers.

MOVING A BIG ARMY

Transporting Troops In Time of War Is a Gigantic Task.

A WORK OF INFINITE DETAIL.

What It Would Mean In Railway Cars of Various Kinds and In Supplies and Equipment to Carry a Million and a Half Men Across the Country.

Before a body of troops is entrained the time and place of every move are mapped out, including the date and place of entraining, destination, time of arrival, route, assembly point, time of troops leaving assembly point, route of assembly point to train, time of arrival at station, time of boarding train, time of departure of train, rate of travel over each section of route, time, place and duration of stops; time and place of feeding troops and animals and a schedule showing the assignment of troops and equipage to each car. Aside from this are countless details connected with procuring supplies, the disposal of troops and their care.

All these preliminary arrangements must be made by an officer of the quartermaster corps. The first thing to be done is to procure lists with weight of all property to be shipped, obtain this material and make out the bill of lading. This, with the number of men and officers, constitutes a basis on which he estimates the number and kind of cars needed. He then engages the cars and provides loading facilities, such as material for blocking and lashing, and constructs necessary ramps, or runways, for entraining animals or wagons.

Next, on the arrival of the cars, he inspects them from a thousand major and minor angles. All cars must be clean. Passenger cars must be fully supplied with water and ice, sufficiently lighted and heated and all other appurtenances in proper condition. Stock cars come in for special attention.

Then the number of men or kind and quantity of supplies allotted to each car is marked on the side or steps, together with the name of the organization. In loading men three are assigned to each section in tourist sleepers or three to each two seats in a day coach.

Another important point is to keep the troops of each unit with all equipment together. This is important in case of sudden attack. Imagine the fate of a unit of troops suddenly detrained at the firing line without equipment!

A possible element of delay lies in the timing of the arrival of troops at the station. There must be no time lost by cars waiting for the troops. The facilities for loading animals and wagons at each station on each route should be part of the quartermaster corps' records. Quick and noiseless loading and unloading of animals without confusion are an art in themselves. Dispositions of individual animals must be studied. Gentle animals should be placed opposite doors and therefore loaded last.

The time of loading and unloading has been carefully tabulated and should not exceed the following: Infantry, one hour; cavalry and light artillery, one and one-half hours; heavy artillery and engineers with bridge train, two hours. All movements, loading, entraining, detraining, feeding and watering and exercising men and horses, are made in military fashion.

With each train kitchen cars are provided. Otherwise baggage cars are fitted up by troops or arrangements made for procuring meals, or at least liquid coffee, at stations en route. Feeding of men and animals is in itself no small matter.

Say the war department was called upon to transport twenty field armies of 82,000 men each, or 1,640,000 men. In moving such a military force the railroads must carry, besides the 1,640,000 men, 700,000 mounts and draft animals, 60,000 vehicles and 3,360 big guns.

To accomplish this the quartermaster corps must have available at the right points 42,300 passenger coaches, 7,700 baggage cars, 21,100 box cars, 37,980 stock cars and 15,500 flat cars, making a total of 124,580 cars, or 7,320 trains with as many engines.

Here is the government's minimum estimate of the gross weight of materials needed each month by this force of 1,640,000 men: Rations, 250,630,460 pounds; ammunition, 7,046,160 pounds; forage, 623,147,600 pounds; general quartermasters' supplies, 33,794,440 pounds; clothing and equipage, 22,680,340 pounds; ordinance supplies other than ammunition, 1,622,740 pounds; engineers' supplies, 12,208,320 pounds; signal supplies, 9,043,260 pounds; medical supplies, 597,160 pounds; candy and tobacco, 319,680 pounds, making a total of 961,089,100 or nearly 1,000,000,000 pounds. The transportation of this enormous weight would require fifty-five trains of thirty cars each day as long as the force was in the field.—Leslie's.

Returning from a law enforcement trip to Oklahoma, Sheriff Higdon of Ray county brought to the Richmond Missourian an interesting exhibit showing one of the many tricks used to ship liquor into dry territory. It was a 'monkey flask," a cocoanut into one of the eyes of which a cork had been neatly fitted. Federal officers at Tulsa recently found that much whiskey had been shipped into Oklahoma in cocoanuts from which the milk had first been removed to make room for the firewater. These "monkey flasks" held scarcely a pint but sold readily at $2.50 each.

A GOOD FRIEND.

A good friend stands by you when in need. Maryville people tell how Doan's Kidney Pills have stood the test. Mrs. C. McMonigal, of 206 N. Main St., Maryville, endorsed Doan's over four years ago and again confirms the story. Could you ask for more convincing testimony?

"I suffered for years from disordered kidneys and at times the pain in my back was so bad I had to scream," says Mrs. McMonigal. "I couldn't rest well and had dizzy spells. Since I used Doan's Kidney Pills, I have felt better in every way. I can certainly recommend them." (Statement given October 2, 1912.)

On June 12, 1916, Mrs. McMonigal said, "I never hesitate to say a good word for Doan's Kidney Pills, as they have given me permanent benefit."

After living for 72 years in Lincoln township, Holt county, F. W. Walter died at his home in Corning last week aged 88 years. Speaking of the difficulties attending the immigration to this country of this hardy pioneer the Corning Mirror says: "After a ten weeks voyage across the Atlantic and Gulf of Mexico the Walter family landed at New Orleans on the day before Christmas, 1844. Thence they came up the Mississippi to St. Louis, and from that city to Weston in Platte county. At the latter point they left the boat and came by wagon to Holt county."

To give an idea of the immensity of the horse business carried on at Lathrop during the past three years the Optimist prints the following: Outgoing shipments over the Burlington totaled 6,670 cars or 132,835 head. The Santa Fe handled 5,587 cars or 121,621 animals. This makes a total of 12,357 cars, 254,456 animals. Compiling the freight clear through to the coast at $160 a car over the Burlington and $200 a car over the Santa Fe the cost of moving the war horses is seen to have exceeded two and a quarter million dollars. The first cost of the animals was probably 44 million dollars.

Besides running a threshing machine and dealing in grain an Altamont farmer has developed a small Wild West show which delighted his neighbors at a Fourth of July picnic. Maud Bird Files Suit for $3,380, Claiming That Sum Is Due Her on Agreement.

Maud Bird filed a suit today against R. L. Bilby, trading as the Nodaway Valley Company, for $3,380 on a contract. Mrs. Bird's husband, John Bird, was killed a number of years ago and the petition states it was due to negligence. An agreement and contract was entered into by Mrs. Bird and Bilby in which Mrs. Bird was to receive $20 a month during the infancy of her youngest child. The petition claims $820 was paid, and the balance or $3,380 is unpaid and due. The child at that time was about six months old.

Arkoe Man Charged With Resisting Arrest by Mort Smith—Spectators Said to Have Taken Part.

Word was sent to Sheriff Dowden who went to Arkoe and arrested Rufus Smith on a charge of common assault and resisting an officer. He waived preliminary and was bound over until the September term of court.

CHICAGO MEN READY MONDAY.

Special to The Democrat-Forum.

Chicago, Aug. 9.—Major Chipperfield, who is superintending the operation of the exemption boards here, said today that he would wire General Crowder that ten thousand drafted Chicagoans will be ready for the new national army next Monday.

TO PASS ON CLAIMS SOON

Board Will Meet Tomorrow to Check up and More Men Will be Called —Yesterday's Results.

One-third of Nodaway's quota of 202 men for the selective draft will be called to the colors September 1 to go immediately to training cantonments, according to the ruling of Provost Marshal General Crowder.

The following telegram was sent yesterday from Washington to governors of states cautioning them to make certain the first one-third of their quota of the first increment of registered men is ready in this time:

"New regulations governing mobilization and certification of men from district boards to adjutants general will be mailed to you Aug. 9. Local boards should certify to district boards daily those who have been called and who have not been exempted or discharged because they failed to file a claim or because their claim has been decided adversely.

Strict Compliance Necessary.

"Strict compliance with this rule is necessary since on Sept. 1, the war department will call for not to exceed one-third of the quota from each state to be entrained for mobilization camps between Sept. 1 and Sept. 5. Unless we wish to be put in a position of not furnishing men as fast as the war department is ready to receive them, each state should have accumulated by Sept. 1, a minimum of one-third of its quota not exempted or discharged. This can only be attained if local boards crtify these lists up with great expedition."

The message was followed by a new ruling on exemptions because of dependents, which is expected to decrease considerably the loss of men from military service.

Boards are authorized to deny exemptions to married men in cases where parents or other relatives of wife or husband are willing to assume the burden of the wife's support during the husband's absence. The same action applies where drafted men's employers agree to continue his salary.

A third supplemental ruling provides that exemption may be denied in the case of a man who has supported his dependents by his own labor on land he owns, but which could be rented so as to continue support for his wife.

Yesterday's Examination.

The total number of men examined yesterday was 128, seventy-two of them being rejected on account of physical defects. Fifty-six were accepted, thirty-five of them claiming exemptions, twenty filing no claims, and one filing an appeal to the district board.

Consideration of claims for exemption will be begun by the local board tomorrow. Then will be known the number that will yet have to be examined in order to obtain the quota. A considerable number of the men needed will be obtained, it is felt, from those whose exemption claims are refused.

More men will be summoned to appear for physical examination next week. It is probable that 400 men will be ordered to appear.

The men examined yesterday and the results of the examination were:

Marion Lyman Rickard, Pickering; rejected, throat trouble, collar bone broken.

Thomas O. Hughes, Guilford, rejected, deformed shoulder and spine.

Alloysius Bernard Henggler, Maryville; rejected, left leg.

Ora E. Keever, Skidmore; rejected, flat feet.

C. E. Kane of Maryville Who Is in France Writes of Experiences to University Paper.

According to the Daily Missourian of Columbia, the new address of Missouri ambulance men, of which Charles E. Kane of this city is a member, is now "T. M. 133 Convois Automobiles, B. C. M., Paris, France." The new address is the headquarters of the transport service, in which the men are now engaged.

The Missourian says:

Members of the University of Missouri unit of the American Ambulance Field Service are enjoying life "Somewhere in France" with unexcelled food, time for recreation and unbounded enthusiasm in their work, according to word just received from Charles E. Kane, formerly instructor in the School of Journalism. The letter, written July 14, the French Fourth of July, celebrating the fall of the Bastille, follows:

"Somewhere in France, Saturday, July 14.—This is the French Fourth of July—ten days after our arrival in France, a week after our arrival in this training camp for truck (cannon) drivers—and we have a regular banquet at the expense of the French government, which is feeding us, training us to be drivers of five-ton Pierce-Arrow trucks, and paying us the astonishing wages of five sous (about five cents) a day. Twenty-two members of the Missouri unit of the American Field Service are here. Of the four others, Gardner, Gardere and Frick are in training for the ambulance branch of the service, and Bruner is still in Paris.

"The men here now—roughly classified as the 'Rochambeau bunch', because they came ove ron that liner—feel like veterans at present. Eleven new men from the La Touraine came in yesterday (a larger group went on to a new camp), and the old timers here are taking part of this holiday off to show them the ropes. Others have driven off on trucks to the nearest big town on the front; a good many are writing letters; some are in at the village a mile away and the rest are trying to digest the banquet of ham, sausage, beef, beans, lettuce, bread, butter, jam, coffee and champagne, not to speak of the cigars—and all of this in France! The anniversary of the fall of the Bastille is a great holiday here, and no scarcity of food is apparent. We are well fed all the time, too, but not so well as today, of course.

"Ordinarily we do not have a holiday. We get up at 6 and go to bed at 9:30, all by French time, which is on the daylight-saving plan. During the

French Troops Gain Ground in Flanders—Germans Try to Force Back Russo-Roumanians.

Special to The Democrat-Forum.

Paris, Aug. 9.—Far from having her man power on the Eastern front exhausted, Germany is using eighty-eight divisions, or approximately a million one hundred forty-five thousand seasoned first line troops against the Russians and Roumanians. These figures were secured today from members of the Russian mission now in Paris. They confirm the belief recently expressed that Germany purposely falsified their statements as to the population of the country before the outbreak of the war.

Allied Troops Press Forward.

London, Aug. 9.—While British artillery pounded at the defenses of the great German base at Lens in Northern France, Allied troops pressed forward in Flanders during the night, gaining ground near Bieschoote, the war office announced today. FIVE CENTS A DAY

(Continued from Page 1.)

day we have sometimes as much as three hours to ourselves; the rest of the time usually goes like this: 6:05, setting-up exercises; 6:30, breakfast (petit dejeuner); 7, assembly, roll-call; then drill; 9 to 11, truck driving; 11:30, lunch (dejeuner); 1:30, roll-call; 2 to 5, (usually later) truck driving; 6, dinner (diner); 9, roll-call; 9:30, taps, lights out.

"We are learning pretty well the trick of driving in convoy and can almost separate the French manual of arms from the American manual, which most of us have had training in; so we hope to get out into real service some time this week, with the two sections of sixty drivers each that are in training here. Our twenty-two men are in one squad under the direction of a corporal named Miller; one of the two other squads is made up of Boston Tech men, and the third is of men who came unattached.

"The boys asked me to explain why we went into the camion service instead of the ambulance work. When we arrived in Paris we found that the French needed transport drivers more than they did ambulance men, and as we came all the way across the ocean with the idea of being of the greatest possible service, the men voted for the transport work. There will be plenty of chance to see the front; our sections—all the new American transport men—are going into Mallet's Reserve, which is shifted to the place where things are happening. We may work all the way from Belgium to Switzerland. Anybody who cares to write to us can reach us best through addressing us at 21 Rue Raynouard, Paris, France. Incidentally, it takes a nickel's worth of stamps.

"Our quarters here are in a neat, whitewashed stable in a picturesque country and on a French farm. Our place is considerably drier than the tents in which most of the men are quartered, and we are very well satisfied. The French soldier-mechanics who are quartered in the loft above, have made us some shelves, some benches and a table. Just as a precaution, most of the men have had their hair cut short or their heads shaved. Cowan is our barber, and he is the best in camp, judging from the other heads we see. 'Jumbo' Farmer had his hair cut short and an M shaved on his head. Several of the bunch have left off shaving their upper lips. The home folks will greet a queer looking lot of fellows in—well, a year or two or three."

A SUCCESSFUL CHAUTAUQUA

Graham Assembly Was a Financial Success—Plans for One Next Year.

The Graham Chautauqua closed Tuesday night with an entertainment by the Swiss Family Plouer, which was very pleasing and well received. They were followed by J .Alden Loring ,in an illustrated lecture of the Roosevelt Expedition in Africa. Mr. Loring was a member of the expedition and gave an entertaining talk.

The Chautauqua lasted six days, two programs each day, all of which with the exception of one or two programs, were splendid, giving entire satisfaction to the good people of Hughes township.

The Chautauqua at Graham was a decided success and this was due largely to the efforts of the executive committee, consisting of Dr. E. L. Morgan, president; C. R. Leeper, vice president; J. N. Geyer, secretary; W. E. Freytag, treasurer; F. L. Miller, C. H. Talbott, Frank Lyle, Clyde Long, Frank McNeal, William Morris and Dan Mowry, who worked faithfully and earnestly for the success of the enterprise and this was made possible by the generous support given them by the citizens of the community and whose patronage was certainly appreciated by the committee.

Plans are already under way for a Chautauqua next year, as all bills will be met and there will be a surplus in the treasury.

The people of Hughes township are entitled to praise for their support of such enterprises as this.

FIRE IN COAL AT NORMAL

About $400 Damage Resulted at the State Normal School Bins This Morning.

For the second time this summer fire broke out this morning in the coal stored in the bins at the Normal school, in the opposite end of the bins.

The fire had been smouldering for several days but attracted no attention until early this morning when it suddenly blazed up and fired the building in which it was stored. The fire department was called at once but it was some time before enough hose could be found to reach from the standpipe which was the nearest point at which the hose could be attached. Fire Chief Rowley stated that it was the longest line of hose he had ever laid.

Most of the damage done was to the roof of the bins and will probably amount to $300 or $400. The coal is being removed and will all be saved.

At the Empire Tonight.

The spectacle of a speeding auto plunging over the cliff into the sea, carrying its occupants to destruction, furnishes a big thrill in "Redeeming Love" which comes to the Empire Theatre tonight. It was a Morosco-Paramount Picture starring Kathlyn Williams supported by Thomas Holding.

Special to The Democrat-Forum.

Washington, Aug. 9.—Secretary of War Baker refused either to confirm or deny the published reports that a German spy succeeded in poisoning the dough from which six thousand loaves of bread were baked four days ago at Washington Barracks. "I know nothing about the matter," the secretary said. "No report has been made to me about it." It was admitted here that a batch of bread had been destroyed.

That this narrative is true and that truth thus may be stranger than fiction is attested by the Altamont Times. The women folks of the Marion Wilson household were chasing a rat which they had found in the cave. Interested in the progress of the battle, a little girl started down the cave steps just as the rat, hard-pressed by his adversaries, came up. He tried to run up the little girl's sleeve, squeezed his head past the wristband and there choked to death.

It's an ill wind that blows good to no one, and even the escape of live baggage from a Burlington train brought a little advertising to the Tarkio Avalanche as this item proves: "Lost—A reward will be given for the return of a brindle Angora cat which escaped from the baggage car on the morning train Tuesday, near the brick yard"

While hunting for a bootlegger's stock in trade at Ellston, Iowa officers found the harness stolen from a Worth county man last week, but thus far have not been able to apprehend the thief and thus claim the $150 reward.

A Perfect Baby

To possess a literally perfect child is by no means impossible. The expectant mother should be calm and the days should be filled with sunshine and happiness.

Millions of women have used the safe, external, penetrating preparation known as "Mother's Friend". By its use the abdominal muscles, which nature is expanding, relax easily when baby is born. This naturally makes for infinitely less pain and danger at the crisis.

Write to The Bradfield Regulator Co., Dept. H, 300 Lamar Building, Atlanta, Ga., for interesting free book "Motherhood and the Baby".

Do not neglect to get a bottle of "Mother's Friend" from your druggists' tonight. It is a tried preparation and is of the greatest value to expectant mothers.

MOVING A BIG ARMY

Transporting Troops In Time of War Is a Gigantic Task.

A WORK OF INFINITE DETAIL.

What It Would Mean In Railway Cars of Various Kinds and In Supplies and Equipment to Carry a Million and a Half Men Across the Country.

Before a body of troops is entrained the time and place of every move are mapped out, including the date and place of entraining, destination, time of arrival, route, assembly point, time of troops leaving assembly point, route of assembly point to train, time of arrival at station, time of boarding train, time of departure of train, rate of travel over each section of route, time, place and duration of stops; time and place of feeding troops and animals and a schedule showing the assignment of troops and equipage to each car. Aside from this are countless details connected with procuring supplies, the disposal of troops and their care.

All these preliminary arrangements must be made by an officer of the quartermaster corps. The first thing to be done is to procure lists with weight of all property to be shipped, obtain this material and make out the bill of lading. This, with the number of men and officers, constitutes a basis on which he estimates the number and kind of cars needed. He then engages the cars and provides loading facilities, such as material for blocking and lashing, and constructs necessary ramps, or runways, for entraining animals or wagons.

Next, on the arrival of the cars, he inspects them from a thousand major and minor angles. All cars must be clean. Passenger cars must be fully supplied with water and ice, sufficiently lighted and heated and all other appurtenances in proper condition. Stock cars come in for special attention.

Then the number of men or kind and quantity of supplies allotted to each car is marked on the side or steps, together with the name of the organization. In loading men three are assigned to each section in tourist sleepers or three to each two seats in a day coach.

Another important point is to keep the troops of each unit with all equipment together. This is important in case of sudden attack. Imagine the fate of a unit of troops suddenly detrained at the firing line without equipment!

A possible element of delay lies in the timing of the arrival of troops at the station. There must be no time lost by cars waiting for the troops. The facilities for loading animals and wagons at each station on each route should be part of the quartermaster corps' records. Quick and noiseless loading and unloading of animals without confusion are an art in themselves. Dispositions of individual animals must be studied. Gentle animals should be placed opposite doors and therefore loaded last.

The time of loading and unloading has been carefully tabulated and should not exceed the following: Infantry, one hour; cavalry and light artillery, one and one-half hours; heavy artillery and engineers with bridge train, two hours. All movements, loading, entraining, detraining, feeding and watering and exercising men and horses, are made in military fashion.

With each train kitchen cars are provided. Otherwise baggage cars are fitted up by troops or arrangements made for procuring meals, or at least liquid coffee, at stations en route. Feeding of men and animals is in itself no small matter.

Say the war department was called upon to transport twenty field armies of 82,000 men each, or 1,640,000 men. In moving such a military force the railroads must carry, besides the 1,640,000 men, 700,000 mounts and draft animals, 60,000 vehicles and 3,360 big guns.

To accomplish this the quartermaster corps must have available at the right points 42,300 passenger coaches, 7,700 baggage cars, 21,100 box cars, 37,980 stock cars and 15,500 flat cars, making a total of 124,580 cars, or 7,320 trains with as many engines.

Here is the government's minimum estimate of the gross weight of materials needed each month by this force of 1,640,000 men: Rations, 250,630,460 pounds; ammunition, 7,046,160 pounds; forage, 623,147,600 pounds; general quartermasters' supplies, 33,794,440 pounds; clothing and equipage, 22,680,340 pounds; ordinance supplies other than ammunition, 1,622,740 pounds; engineers' supplies, 12,208,320 pounds; signal supplies, 9,043,260 pounds; medical supplies, 597,160 pounds; candy and tobacco, 319,680 pounds, making a total of 961,089,100 or nearly 1,000,000,000 pounds. The transportation of this enormous weight would require fifty-five trains of thirty cars each day as long as the force was in the field.—Leslie's.

Returning from a law enforcement trip to Oklahoma, Sheriff Higdon of Ray county brought to the Richmond Missourian an interesting exhibit showing one of the many tricks used to ship liquor into dry territory. It was a 'monkey flask," a cocoanut into one of the eyes of which a cork had been neatly fitted. Federal officers at Tulsa recently found that much whiskey had been shipped into Oklahoma in cocoanuts from which the milk had first been removed to make room for the firewater. These "monkey flasks" held scarcely a pint but sold readily at $2.50 each.

A GOOD FRIEND.

A good friend stands by you when in need. Maryville people tell how Doan's Kidney Pills have stood the test. Mrs. C. McMonigal, of 206 N. Main St., Maryville, endorsed Doan's over four years ago and again confirms the story. Could you ask for more convincing testimony?

"I suffered for years from disordered kidneys and at times the pain in my back was so bad I had to scream," says Mrs. McMonigal. "I couldn't rest well and had dizzy spells. Since I used Doan's Kidney Pills, I have felt better in every way. I can certainly recommend them." (Statement given October 2, 1912.)

On June 12, 1916, Mrs. McMonigal said, "I never hesitate to say a good word for Doan's Kidney Pills, as they have given me permanent benefit."

After living for 72 years in Lincoln township, Holt county, F. W. Walter died at his home in Corning last week aged 83 years. Speaking of the difficulties attending the immigration to this country of this hardy pioneer the Corning Mirror says: "After a ten weeks voyage across the Atlantic and Gulf of Mexico the Walter family landed at New Orleans on the day before Christmas, 1844. Thence they came up the Mississippi to St. Louis, and from that city to Weston in Platte county. At the latter point they left the boat and came by wagon to Holt county."

To give an idea of the immensity of the horse business carried on at Lathrop during the past three years the Optimist prints the following: Outgoing shipments over the Burlington totaled 6,670 cars or 132,835 head. The Santa Fe handled 5,587 cars or 121,621 animals. This makes a total of 12,357 cars, 254,456 animals. Compiling the freight clear through to the coast at $160 a car over the Burlington and $200 a car over the Santa Fe the cost of moving the war horses is seen to have exceeded two and a quarter million dollars. The first cost of the animals was probably 44 million dollars.

When the children of Ernis Jarman near Unionville tried to have some fun with the rope attached to the carrier in the haymow a serious thing happened. Through the loosening of two bolts the heavy carrier dropped from the track and struck one of the children upon the left temple. Only the fact that it was a glancing blow saved the little boy from instant death and as it is he carries two deep cuts where the carrier struck him

Besides running a threshing machine and dealing in grain an Altamont farmer has developed a small Wild West show which delighted his neighbors at a Fourth of July picnic. He has promised the Times that he will bring his show to the Altamont colt show this fall—if properly encouraged. It consists of bucking horses and steers.

Another life was sacrificed to the pitchfork last week near Tarkio when B. J. Jones slid from a load of sheaf grain upon a fork and received injuries from which he died three days later.

From a yearling lamb Jim Tinsley of Putnam county sheard 16 pounds of wool for which he received $10.69, reports Casey, the county traveler for the Unionville Republican.
